

KA1 ERASMUS+ COURSES FOR TEACHERS AND TRAINERS BASIC ENGLISH WITH KELSIE

Objectives

The aims of the course are:

- Feel comfortable with the usage of English as a second language; instill confidence and motivation for the language-learning process.
- Learn English through 'learning by doing' associative teaching practices; new concepts of vocabulary and grammar are introduced within a new experience, giving the brain the chance to better solidify the new information and store it for future usage.
- Talk, talk, and talk again! Stimulation of conversation through various techniques; usage of photos, spontaneous speech, and prepared presentations. Fostering of a relaxed, safe, and judgement free zone where everyone can practice starting from where they are at. By the end of the course, each teacher will have prepared an oral presentation in English for their colleagues back home.

Target Group

This training course has been created for teachers in general, especially teachers of foreign or additional languages. Overall, this course is recommended for primary and secondary teachers, who want to get comfortable speaking English and learn from a native speaker. Teachers that have felt frustrated with their level of English or the resources they have at their disposal and want an applicable way to improve and practice so they can increase their competencies to hold a conversation in the English language.

Language of course

This course will be provided in English. This course is provided by a North American girl from the United States. She has an open, neutral American accent.

Methodology

The approach used is highly practical and based on the previous professional experiences that the trainer has been accumulating in both the language and coaching fields. This course focuses on learning by doing through conversational abilities. New vocabulary and grammar will be introduced within the context of speaking. It requires the active participation of the group members to achieve the most satisfactory results! The course will be adapted to the students' levels of English and their main objectives within the language (for example increase speaking abilities, foster various language skills such as debate/presentations/giving opinions, have a heightened understanding of the grammar tenses and vocabulary within their specific teaching discipline, etc.). An easy 'test' will be given to position the students to understand their levels before the course starts. This way the trainer can best adapt and help every single teacher with their individual language goals!
