

# SESS– STRATEGIES FOR EMOTIONAL SUCCESS IN THE SCHOOLS

## Objectives

The objectives of this course are:

- Learn applicable strategies to implement in the classroom
- Foster a creative mindset and learn how to manage individual affective factors such as motivation and self-esteem
- Be challenged to work in teams and learn different components to understanding leadership

## Target Group

The training course is addressed to teachers in general, especially teachers that are working as tutors directly with students and therefore have contact with the emotional side more often and potential conflict management situations. The course is recommended for primary and secondary school teachers, university teachers and even teachers at language schools or of private classes.

## Language of course

This course will be provided in English. The trainer has many years of experience working with students and teachers who do not speak English as their first language. The language level will be adapted according to the level of comfort of the participants. Emphasis will be placed on non-verbal communication as well through gestures, smiles, and movement.

## Methodology

The approach used is associative learning, through which new theoretical concepts are presented and then instilled through practical application. The strategies implemented are based on the previous professional experiences that the trainer has been accumulating in this field throughout many years of experience with differing groups of people in the educational and coaching fields. The course requires the active participation of the participants to achieve the most satisfactory results for each person. We will constantly debate the effectiveness of these strategies and bring them back to our classrooms to give examples of how we can implement them.

## Program

### Day 1 – 4 hours

#### Emotion Through Motion- the Emotional Side to Learning

- Welcome meeting. Presentation of programme. Presentation of participants and sharing expectations
- Introduction to the course, presentation of participants and sharing expectations
